

N.C. Qso Party Report 2017

First off thanks to all who showed up and pitched in as operators or loggers or just as a cheering section. We had 12 people through the course of the day starting with 6 for breakfast and the rest coming and going throughout the day.

The CW station manned by myself, WD4OIN, K3DEP and N2COP operating almost entirely on 40M with a few contacts on 15M racked up 107 total QSOs. We started out at 100W output but reduced that back to 50W output to reduce the interference to the SSB station.

The SSB station was handled by a lot of people including one or two licensed tourists and a Boy Scout who showed up for a while. I'm sure I missed someone but I do recall WD4OIN, N2COP, KI4JDE, KI4YSY, N4NXX, WD4FTR, K1IZ, N3QH among the crowd in the SSB room. SSB turned in 62 QSOs giving us a total of 169. My apologies to anyone I may have missed.
